

i-kp01

The i-kp01 is designed to work with i-on and Menvier control panels.

The keypad allows the user to set and unset the system and installers to program the system.

At a glance...

- A large backlit LCD display showing two lines of 20 alpha-numeric characters
- Four LEDs show the setting status of partitions or levels
- "A, B, C, D and Unset" keys provide quick setting and unsetting of the system
- A four way navigation key allows the installer and user to scroll through easy to follow menus
- Enables shorter warning time when auto-setting
- A built in proximity tag detector that reads all standard proximity
- Built in panic button enabled in programming
